

# AIRpipe R & D

## Case Study – March 2012

SKF Global Technical Centre (GTC) is focused on innovative research and development by offering advanced technology and analysis through skilled personnel with advanced equipment. GTC is currently staffed with about 400 professionals in a 1.5-acre facility.

This GTC facility maintains their global responsibility through continuous, process- and project-based engineering with AIRpipe's eco-friendly, reliable, and maneuverable aluminum piping systems.

### The System:

- 80 mm (3")
- 50 mm (2")
- 25 mm (1")

Advancing Compressed Air & Gas Systems
